THE LIKENESS OF GOD

BY ROMAN I. ULANS

directly from the publisher.

Roman Ulans' *The Likeness of God* is an intriguing book that finds scientific support for the Book of Genesis in the Holy Bible. *The Likeness of God* lays out a refined version of intelligent design that accepts the work of modern cosmologists and indeed claims support for theism from these results. It reads more like a popular science text than a theological tract.

Ulans' background itself is partly responsible for the thoughtful tone and attitude. His professional military and engineering experience, education at MIT and Harvard, and now at an advanced age in life, Ulans has provided a breadth of understanding of the complexities of Man's life on Earth.
