

Ernie Martin (7/7/23)

It's possible I had one of the most varied time at COMSAT:

- 5 years at the Labs, and our pitch to AT&T to let us build a satellite
- Years on the Marisat program
- 2 years on Aerosat, posted in Europe with ESA
- Years on STC's Direct Broadcast Satellite System with service directly to consumers
- Years on COMSAT's advisory services, in Beijing, Kuwait, etc.
